

White Paper: ShadowSight -- The Ultimate Proctor Defeat System and Test Environment Equalizer

Abstract:

ShadowSight, formerly GhostSuite, is a stealth-class virtual camera, input management, and proctor-neutralization platform designed to expose the weaknesses of outdated proctored testing systems. By enabling seamless switching between synthetic and real video feeds, stealth hotkey-controlled device redirection, and spoof-resistant device identity persistence, ShadowSight ensures users retain control of their environment while revealing the inherent flaws in surveillance-based assessments...
